ABOUT

A Computer Science degree holder that has the skills and experience of a web programmer and a people-oriented service crew. Armed with technical and interpersonal skills, I could work well with any team and take on a variety of tasks.

SKILLS

Web Programming

Frontend development
• Node.JS, Webpack usage and configurations
• JavaScript frameworks such as Angular Vue for progressive web app development
• Ionic Framework 3 and 5 for cross-platform mobile apps
• Incorporation of CSS frameworks, UI and design toolkits
• API integration in frontend pages

Backend development
• Laravel and Lumen for PHP-based API development
• Django for Python-based API development
• Express for JavaScript-based API development
• Sequelize, Eloquent ORMs
• ERD design, normalization, query composition
• API testing tools such as Postman

Project Deployment and Maintenance
• Docker installation and configuration
• Shared server setup via YAMLs and Git postreceives
• Kubernetes pods deployment and configuration
• Usage of FTP and SSH for remote server access

Information Technology, Clerical, and Multimedia
• Microsoft Office and Google Suite
• Remote access tools such as TeamViewer
• Remote meeting tools such as Google Meet, Zoom
• IM platforms such as Discord, Slack, Teams
• Adobe Illustrator, Photoshop, InDesign
• Figma and Adobe XD for prototyping
• Basic network security protocols
