ABOUT ME

An experienced web programmer and former college instructor skilled in the development, deployment, and maintenance of robust web systems and applications. I always look forward to learning new tech stacks, working with various people, and expanding and sharing my skill sets.

SKILLS

Web Programming
- Well-versed in Vue3 and native HTML+JS for web app development
- Experienced in NodeJS and Webpack for project size optimization and adding feature libraries
- Advanced experience in Laravel (PHP) & Express (JS) for API development
- Utilization of Sequelize & Eloquent ORMs for data query and manipulation in MVC frameworks
- Experience in ERD design, database normalization, SQL composition and optimization
- Experienced in the incorporation of CSS frameworks, UI and design toolkits
- Advance experience with API and payment gateway integration into new or existing projects

Project Deployment and Maintenance
- Docker installation, configuration, and image publishing
- Shared server setup and deployments
- Kubernetes Pods configuration and deployment
- Remote server access using SSH
- Remote server file transfer using FTP
- Creation of project documentation for developers and system users
- Use of Trello for task distribution, management, and tracking system issues
- Experience in agile methodology and the Scrum framework

Other Skills
- Experienced in using Microsoft Office and Google Office application suites
- Experienced in using remote desktop tools
- Adobe Illustrator, Photoshop, InDesign for asset and document design
- Figma and Adobe XD for design prototyping
- Experience with using ServiceNow
- Working knowledge in Microsoft Active Directory
- Working knowledge in network topologies and network security
- Proficient in using and adapting to multiple tech stacks and software for specific use cases
